University of Wah 2019-
Bachelor of Computer Science 2023
2.64/4

Sir Syed collage Wah Cantt 2017-
FSC 2019
589/1100

Al-Aziz school Taxila 2015-
Matric 2017
684/1050

PROJECTS

Online Recruitment System Based on Personality Prediction

The web app we have developed consists of an admin panel, job provider interface, and job seeker interface, aiming to streamline the job search and hiring process. Through this system, job providers can effortlessly post job listings, specifying their requirements and providing detailed descriptions. On the other hand, job seekers can utilize the platform to search for relevant job opportunities and apply directly. However, before applying for a job, job seekers must first create a profile, which includes building a comprehensive resume and completing a personality assessment known as the Big Five.
